

How to Connect to the Wireless with an IOS device (Ipad, Iphone, or Ipod Touch)

Open your Settings, and click on Wi-Fi, then choose KPOpenWireless:

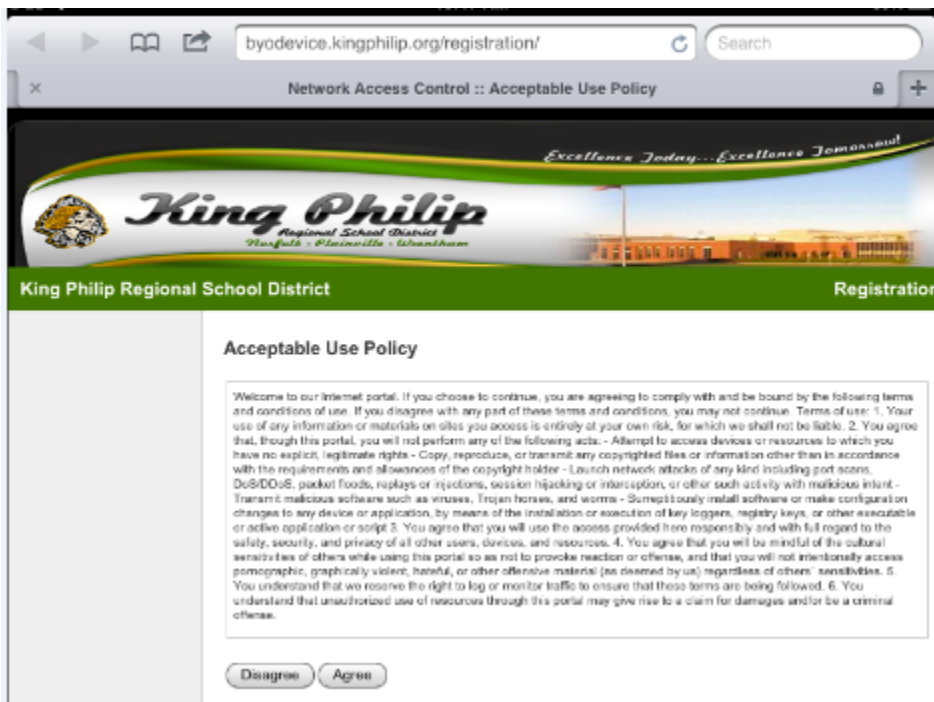

You will be taken to the following page, click "accept":

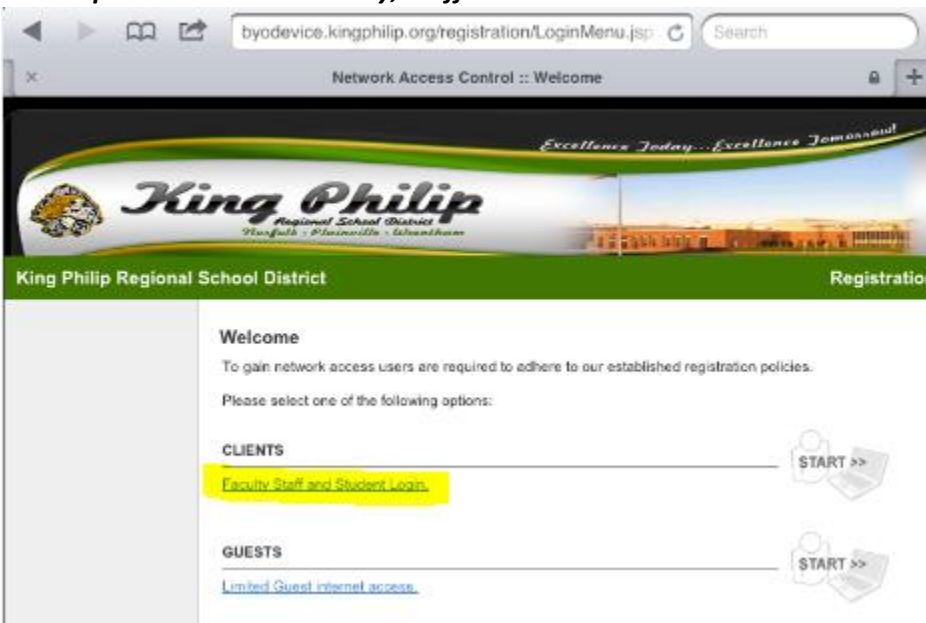

It will be followed by this, click done:

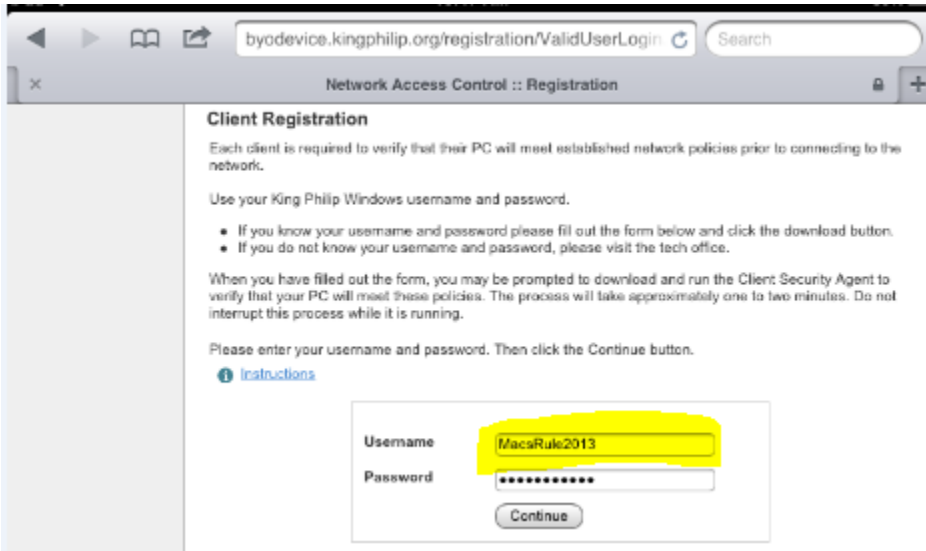

Press the home button, and open up Safari. You will see the following page, click Agree:

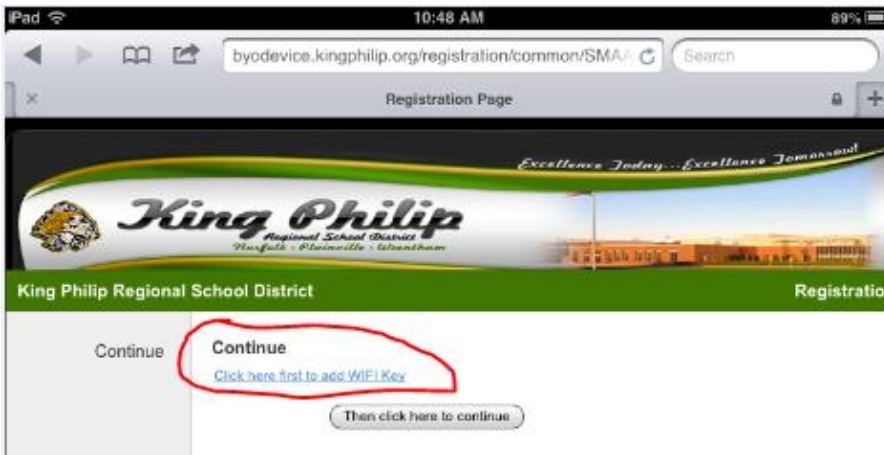

Now click on Faculty Staff and Student logins or Limited Guest: ***If you are a visitor and don't have KP login use the Limited Guest option. Otherwise Faculty, Staff and students should use their KP email address and network password.***

Type in your KP Credentials and click continue:

On this page click the blue link that says "Click here first to add Wi-Fi Key"

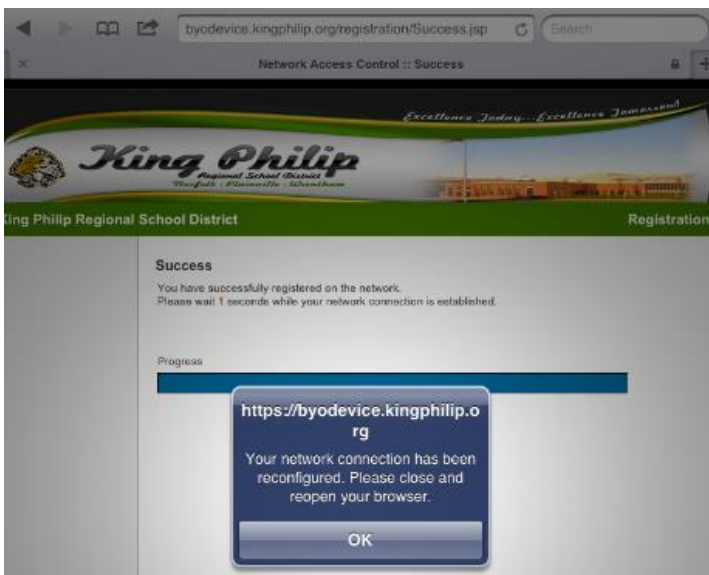

Click Install, then Click Install Now:

Now click the continue button:

You will see the Success screen with a 45 second countdown, after which you will get a pop-up saying you have been reconfigured, and you are now connected to the King Philip Wireless, and your device is registered to you:

Just to confirm, type in a web address in the browser to make sure you are connected:
